

KÄRCHER Puzzi 10/1

The compact Puzzi 10/1 is designed for deep-cleaning carpeted floors and upholstery: Cleaning solution is applied to the pile via a spray nozzle and immediately vacuumed away again by a suction nozzle. In the case of stubborn dirt and stains, the affected areas are pre-sprayed to allow the cleaning agent to act for longer. As the residual moisture content is low, it is possible to walk on cleaned carpets after a short period. A hand nozzle is used for cleaning upholstered furniture, car seats, stair carpets, etc.

Features:

- Thanks to the powerful suction turbine, the drying time is shorter by up to 30% in comparison with other machines.
- The new hand tool combines comfort and ergonomics with high functionality. The additional vision field window makes the control of dirt easier.
- The operation and storage are much easier and time-saving with the new features, accessories storage and cable hook.

Standard Features / Accessories

Upholstery nozzle
Integral accessory holder for hand tool
Additional handle
2,5 m Spray hose with integrated water feed
Crevice nozzle
Hand tool
Cord hook

Part no. 1.100-130.0
